

ERICK ERASMO REYES CRUZ

Senior Fullstack Developer

📞 8124278835 @ erick.erc.10@hotmail.com 🌐 <https://ingreyes-portfolio.vercel.app/> 📍 Monterrey, Nuevo Leon

SUMMARY

Strategic Software Architect and Full-Stack Engineer with over a decade of expertise in designing and scaling high-performance, multi-tenant SaaS platforms. I specialize in bridging the gap between sophisticated system design and intuitive user interfaces. Proven track record in orchestrating high-concurrency, event-driven architectures to resolve complex bottleneck challenges in distributed systems.

I possess a holistic command of the software development lifecycle, from high-fidelity **Figma** prototyping to cloud-native deployment on **Azure** and **AWS** using **Kubernetes**. Passionate about leveraging cutting-edge spatial indexing and data-streaming technologies to deliver robust, maintainable, and industry-leading software systems.

- **System Architecture:** Distributed Systems, Event-Driven Architecture, Microservices, System Design, Scalability, High Availability.
- **Back-End Development:** Java (Spring Boot), Node.js (NestJS, ExpressJS), Python (FastAPI).
- **Front-End Engineering:** React (9+ years), Svelte, TypeScript, HTML5, CSS3, Tailwind CSS, Responsive UI Design.
- **Cloud & Infrastructure:** Azure, AWS, Kubernetes, Docker, CI/CD, Infrastructure as Code.
- **Data, Messaging & Spatial:** Redis, Elasticsearch, Kafka, RabbitMQ, Uber H3 (Spatial Indexing), Geohashing.
- **Product & Design:** Figma, Requirements Engineering, User-Centric Design.

KEY ACHIEVEMENTS

- 💎

Architectural Scalability & Resilience
Spearheaded the transition to a high-concurrency event-driven microservices architecture using **Spring Boot** and **Kafka**, eliminating performance bottlenecks and enabling 99.99% system availability during peak e-commerce traffic events.
- 💎

Spatial Intelligence & Data Performance:
Revolutionized data retrieval for a high-traffic platform by implementing **Uber H3** spatial indexing coupled with **Elasticsearch** and **Redis** caching, reducing complex query latency by 60% and empowering real-time decision-making for end-users.
- 💎

Cloud-Native Optimization & Cost Efficiency:
Engineered a cost-effective, cloud-native infrastructure on **Azure/AWS** leveraging **Kubernetes** auto-scaling, which optimized compute resource allocation and reduced infrastructure operational costs by 35% while maintaining sub-second system response times.
- 💎

Engineering Culture & Velocity:
Transformed technical workflows by standardizing architecture design patterns and implementing high-standard CI/CD practices. This increased cross-functional team delivery velocity by 45% and fundamentally mitigated technical debt in mission-critical applications.

EXPERIENCE

Senior Full Stack Developer

Tech Mahindra

📅 02/2025 - 2026 📍 Monterrey, México

- **Modernization & Microservices Architecture:** Led the migration of legacy monolithic applications into a resilient, event-driven microservices ecosystem using FastAPI (with Pydantic validation) and **Express.js** BFF layers. Orchestrated seamless communication across the architecture by integrating **serverless functions (AWS Lambda, Azure Functions)** to handle **event-triggered workflows**, further decoupled via **Kafka** and **RabbitMQ** for high-concurrency performance. Reduced operational costs by 25% through optimized container orchestration.
- **Cloud-Native Infrastructure:** Engineered scalable deployment patterns on **Azure** using **Terraform** (IaC) and **Kubernetes**, ensuring strict SLA compliance and high availability while optimizing storage across **PostgreSQL** and **MongoDB**.
- **Performance & Data Strategy:** Enhanced system retrieval latency by architecting in-memory indexing solutions with **Elasticsearch** and **Redis**, and led the development of complex **React** and **Svelte** frontends featuring reusable, high-efficiency **TanStack** Table components.
- **Engineering Excellence & Leadership:** Standardized testing pipelines with **Playwright** and Vitest to minimize production regressions; acted as a strategic bridge between stakeholders and engineering, leading technical spikes and planning to drive consistent team velocity.
- **Frontend Performance:** Developed high-efficiency TanStack Table components that handled 100k+ rows of data with sub-200ms rendering time, significantly improving user productivity.

Senior Full Stack Developer

Adecco

📅 2023 - 02/2025 📍 Monterrey, México

- **Architectural Strategy & Distributed Systems:** Spearheaded the modernization of legacy enterprise systems into a high-concurrency microservices ecosystem using **Spring Boot** and **NestJS**; integrated **gRPC** to optimize inter-service communication, resulting in a **50% increase in throughput** and **30% reduction in network latency** over legacy REST protocols.
- **High-Performance Frontend Engineering:** Developed complex, data-driven interfaces using **React** and **Angular** to consume high-throughput microservices, ensuring seamless data synchronization and enhancing user responsiveness in resource-intensive enterprise applications.
- **Operational Excellence & Observability:** Architected a mission-critical observability framework with **Prometheus** and **Grafana**; established real-time performance baselines and automated alerting that **reduced Mean Time To Recovery (MTTR) by 40%** and proactively mitigated **95% of performance bottlenecks** before affecting end-users.
- Engineered CI/CD automation and orchestration on GCP, ensuring 99.99% availability. Optimized workflows increased time-to-market by 60% and reduced operational costs.

EXPERIENCE

Senior Full Stack Developer

AgileEngine

📅 2022 - 2023 📍 Monterrey, México

- **Accessibility SME & Inclusive Design:** Spearheaded the integration of global accessibility standards (**WCAG**) across all enterprise platforms, transforming the job-seeking experience for users with disabilities and ensuring 100% regulatory compliance.
- **Microservices Architecture:** Engineered scalable backend services using **Python** and **Spring Boot** to support high-traffic platforms, optimizing system modularity and performance through efficient microservices implementation.
- **Automation & Stability:** Designed and maintained comprehensive test suites for **React** and Python environments; implemented advanced automated testing strategies that significantly reduced production regressions and stabilized release cycles.
- **Performance Engineering:** Leveraged specialized accessibility and performance audit tools to identify and resolve architectural bottlenecks, resulting in a more inclusive, high-performing platform that streamlined job-matching processes for a global user base.

Full Stack Developer

Ksquare

📅 2021 - 2022

- **Architectural Leadership & Development:** Spearheaded the end-to-end development of a high-scale Learning Management System (LMS); architected robust REST APIs using **NestJS** and **Express.js**, and leveraged serverless computing (**AWS Lambda**, **Azure Functions**) to decouple complex data processing workflows, achieving significant cost-efficiency and auto-scaling performance.
- **Modern Frontend Engineering:** Built scalable, data-driven interfaces utilizing **React** and **Angular** (TypeScript); optimized state management and component reusability, significantly improving the end-user experience across the platform.
- **Cross-Functional Communication & Agile Delivery:** Acted as a technical bridge within the engineering team, facilitating daily syncs to ensure total transparency on development progress; collaborated directly with Product Owners to translate business requirements into technical enhancements that drove measurable improvements in user retention and system performance.

Lead Web Developer

Accenture

📅 2019 - 2020

- **Technical Team Leadership:** Led the end-to-end technical delivery of complex user stories; mentored junior developers through code reviews and pair programming, fostering a culture of technical excellence and high-quality standard adherence.
- **Project Orchestration & Agile Delivery:** Directed technical execution within a microservices-based environment; managed sprint planning and task prioritization, ensuring 100% adherence to project timelines and client-defined quality standards.
- **API Integration & Stakeholder Alignment:** Spearheaded the development of scalable REST APIs using **Java (Spring Boot)** to power high-performance **React** interfaces; partnered closely with Business Analysts to translate complex requirements into actionable technical specifications, ensuring perfect alignment with business objectives.
- **Process Optimization:** Established team-wide coding conventions and standardized documentation practices, significantly improving developer onboarding and maintaining system stability during fast-paced deployment cycles.

Frontend Developer

Accenture

📅 2018 - 2019

- **Scalability & Engineering Culture:** Served as a foundational member of a core team that scaled from 7 to over 50 developers; played a key role in defining technical standards and best practices for a massive enterprise system, ensuring code quality and consistency during rapid team expansion.
- **Advanced Frontend Architecture:** Mastered complex state management using **Angular**, **React** and **Redux Sagas**, delivering highly performant and maintainable architectures for large-scale enterprise platforms.
- **High-Volume Delivery & Prototyping:** Engineered over 100 high-interaction, user-centric screens; pioneered the use of **advanced React patterns** and **mock data strategies** to decouple frontend development from backend availability, effectively accelerating delivery cycles and enabling early stakeholder feedback.

Frontend Developer

Softtek

📅 2016 - 2018

- **Full-Stack Skill Acquisition:** Successfully transitioned from intern to key contributor, accelerating technical proficiency across a diverse technology stack including **Angular**, **PHP**, **Java**, and **React**.
- **System Modernization & UX:** Co-developed a mission-critical course enrollment system, modernizing legacy interfaces with **Angular** and **PHP**; significantly enhanced usability, resulting in a more intuitive and efficient user experience.
- **Database & Backend Maintenance:** Collaborated in high-priority data management by executing complex **SQL** queries and maintaining robust backend services, ensuring data integrity and contributing to 99.9% system uptime.
- **Continuous Improvement:** Proactively resolved critical production defects and performed technical maintenance on large-scale web applications, demonstrating a rapid growth trajectory and a strong commitment to system stability.

EDUCATION

Software Engineer

Universidad Autonoma de Nuevo Leon

📅 2014 - 2019 📍 Monterrey, Mexico

SKILLS

Frontend

Svelte	React	Next.js	TypeScript	Tailwind CSS	TanStack Query	HTML	CSS	JavaScript	Angular	Redux
MaterialUI	Shadcn	Prettier	Sass	SCSS	Zustand	Vite	Tanstack Table	Zod		

Backend

FastAPI	SpringBoot	Node.js	PHP	Java	Python	Express	PostgreSQL	Redis	Maven	Elasticsearch
Uber H3	Kafka	RabbitMQ	Joi							

Testing & Tools

Playwright	Vitest	Docker	GCP	Azure	GitHub	GitHub Actions	Git	Jenkins	Terraform	Jest	Mocha
------------	--------	--------	-----	-------	--------	----------------	-----	---------	-----------	------	-------

Methodologies & Quality

Microservices	Event-Driven Architecture	Hexagonal Architecture	Clean Architecture
---------------	---------------------------	------------------------	--------------------

Cloud

Lambdas	Azure Functions	S3	E2	Azure VM	AKS	GKE	DynamoDB	CDN	Kubernetes
---------	-----------------	----	----	----------	-----	-----	----------	-----	------------

Databases

PostgreSQL	MySQL	MongoDB	GraphQL	SQLite	Pgvector
------------	-------	---------	---------	--------	----------

AI

ChainLang	Cursor	Claude Code	Open Code	ChatGPT	Gemini
